

Securely Manage Remote Platforms and Increase Productivity

Industrial Cloud & Video Group Software Team 2024 Jan.

Value Beyond Hardware Design

Beyond robust hardware design, Advantech has an own software engineering team developing multiple outstanding platform software with up-to-date features which improves availability, serviceability, and usability to minimize costly downtime.

We helps service providers and enterprises extend the cloud to the IoT edge by providing scalable platforms that reliably execute mission and business-critical applications anywhere in the network.

Advantech ICVG Software Team

Redfish Empowered by Advantech Platform Management

Secure Management Interface

Replace IPMI over LAN Authentication Encrypted & Certificate based

Secure

API

Interface

Human Readable Format Easy Scripting

Schemata based Full API documents for programming

Advantech_redfish_technology_v8.00_2023;

Advantech_Redfish_SNMP_User_Manual_v1.00

Advantech_Redfish_RAID_Management_User_Managem

Open Standard DMTF

Actively maintained specification Open Source tools Interoperability Pass DMTF Redfish-Service-Validator

Extension

Seamlessly manage storage equipment and storage services

Advanced Set of Functions compared to IPMI

Next generation platform Management protocol for various servers, storage, network and others systems

Common Interface for (Remote) Platform Management

RESTful API for in out-of-band system management Host Interface specification for in-band management

Keep Updating

Latest Redfish v1.18.0 and Swordfish v1.2.4a Following DMTF and SINA spec. Major update twice per year Under certain service level agreement, customer can get the firmware update.

Advantech Redfish Feature Overview

- User Account and Privileges Management
- KCS Channel Privilege Control
- **System Monitoring**
 - Sensors, Thermal, Power, Health
- Remote Management
 - Power control
 - Boot device selection
- Failure Reporting Utilizing SNMPv3, SMTP, and Redfish Protocols.
 - Fault indication
 - Events and Notifications
- **BIOS** Configuration, BMC configuration

- Advantech OEM API
- System/Chassis Inventory Information
 - Hard Drive, NIC, CPU/DIMM, Add-in Cards, Power Supplies, Fans
- Remote Storage / Virtual media
- Storage Management /RAID configuration (Swordfish & Redfish)
- Service & Session management
- **Server Metadata**
- Software Update (BIOS, FPGA, BMC)
- SSL Certificate and Key Update
